From the Direct Communication Channel

Vector Sigma
Liaison to Realtime Conference

Dear Vector Sigma

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

On behalf of the entire administration team of Websocketslavia we would like to personally thank you for our ongoing efforts at promoting our great country. You are an asset to our people and we know your presentation at this great conference will truly demonstrate the strength and worth of our land.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. All we know is that they are calling this "HTTP 2.0" and based off the commiques we've decrypted is a direct challenge to our main export. We also know they have been in talks with Transportvania to legitimize their new efforts. This must not stand. It is imperative that the other nations continue to recognize the importance of Websocketslavia. A new technology at this time could fragment the market and do irreparable harm to our efforts.

With this in mind it is your duty as a representative of Websocketslavia to remind people there is already a reliable realtime channel that works, is implemented, and in production across most of the realtime world. Our propaganda team also suggests that attempts to discredit this "2.0" from the People's Republic of HTTP would be a mistake. We do not want to appear on the defensive, and more importantly we are not sure who even knows about this. Best to just keep with our strong points, which are many.

Thank you for attending the conference, please be ready to debrief the Prime Minister upon your return from The Great Capital City to the homeland.

Yours Sincerely,

Michael Grabowski
Executive Correspondence Officer

Michael Phillips
Liaison to Realtime Conference

Dear Michael Phillips

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

One of the stated goals of the great conference is to put people first. This is something you have a particular history in and we know your presence here can only help us realize this goal. Technology should serve the people and you understand this as well as others. Please remember to remind those around you of this.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. All we know is that they are calling this "HTTP 2.0" and based off the communique we've decrypted is a direct challenge to our main export. We also know they have been in talks with Transportvania to legitimize their new efforts. This must not stand. It is imperative that the other nations continue to recognize the importance of Websocketslavia. A new technology at this time could fragment the market and do irreparable harm to our efforts.

With this in mind it is your duty as a representative of Websocketslavia to remind people there is already a reliable realtime channel that works, is implemented, and in production across most of the realtime world. Brian Beggs
Liaison to Realtime Conference

Dear Brian Beggs

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

More specifically, we would like to commend you for your ongoing efforts to bring the Greater Tech Republic up to speed with regards to energy and power. Without the ongoing efforts of people like you who knows where we'd be (probably still burning coal and crossing our fingers, what was that all about?)

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. All we know is that they are calling this "HTTP 2.0" and based off the commiques we've decrypted is a direct challenge to our main export. Manny Lopez
Liaison to Realtime Conference

Dear Manny Lopez

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

With the ongoing goal of having a conference centered on connections, we would like to particularly thank you for your efforts in the Greater Tech Republic along these lines. All this technology would be for naught without people. It is a great credit to our country to have you here. The ongoing development of "The Book of Faces" is well remembered among our people, to say nothing of your personal contributions to it.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. All we know is that they are calling this "HTTP 2.0" and based off the communiques we've decrypted is a direct challenge to our main export. Kyle Simpson
Liaison to Realtime Conference

Dear Kyle Simpson

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

While JavaScript isn't the only language spoken in the Tech Republic, it does appear to be the closest thing to a common language we currently have. We recognize you as being on the forefront of developing that language at its core, and know you will share your knowledge to the betterment of all. Be sure to talk to people from United Async Emirates as much of your work will be particularly interesting to them (our intelligence suggests that asynquence is very popular over there).

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. Angelo Huang
Liaison to Realtime Conference

Dear Angelo Huang

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

Sometimes when you've spent a lot of time at a terminal you can forget it is not the entirety of reality. While you have been dutifully writing applications that allow people to communicate in realtime digitally, now is your chance to emulate that in real life. Nothing gets more 'realtime' than speaking to your peers in person. Use this time to its fullest.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence. Dear Paul Pederson

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

Making computers talk to each other is only the beginning. Making what they say look beautiful is where things start to actually feel complete. The fact that you are willing to represent us is our honor. The fact that you also currently live in The Great Capital City should be leveraged: please share your knowledge and love of the city with those who may be visiting for the first time. And as always continue to make Websocketslavia as beautiful as your digital work is known to be.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. Liaison to Realtime Conference

Dear Brett Langdon

On behalf of Prime Minister Wszemiła Kozłowski let me extend my thanks to you for volunteering to represent our nation at this year's Realtime Conference.

As the amount of data generated by the Tech Republic grows it is becoming increasingly difficult to sort the wheat from the chaff, as it were. Helping people find what they are *truly* searching for is now a primary goal. Your efforts along those lines have been both noted and appreciated back home. We are confident your expertise will be an asset both to your fellow attendees and to the conference at large.

Be advised that our latest intelligence hints that the Peoples Republic of HTTP has been researching and developing a technology that directly threatens our State. I don't have to tell you the gravity of this situation. Many operatives have given their lives to find this information, I trust you will keep it in the highest confidence.
